

KONICA MINOLTA

# Important Notes for OS X 10.9 (Mavericks) Users

# 1 Introduction

This document contains the Release schedule of new Mac OS X 10.9 driver and restrictions with Mac OS X 10.8 driver.

Products: Color MFP, b/w MFP, Printer

## 1.1 Background

Until a new driver for Mac OS X 10.9 (Mavericks) is available for your product, you can use the 10.8 driver following the instructions and restrictions contained in this document.

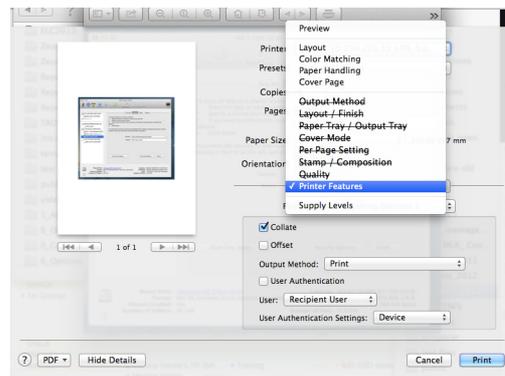

For an updated schedule for Mac OS X 10.9 drivers, we kindly advise that you regularly check our website <http://www.konicaminolta.eu/newos>

## 1.2 Workaround and restrictions

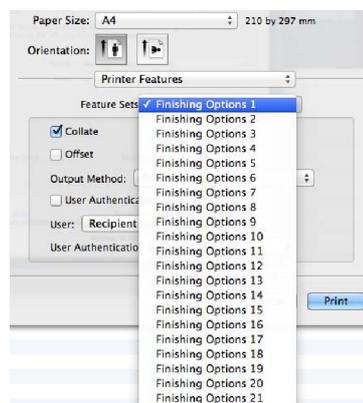

For all Konica Minolta controller you can use the Mac OS X 10.8 driver.

### 1.2.1 Restrictions

Because the new sandbox design the PDE plugins for additional functions like authentication or finishing option may strikethrough by using sandbox applications like preview, mail or aperture. But many functions are available behind the additional menu printer features.

There you can find behind the Finishing Options 1 to 21 (depends from the model and possible options) the most missing settings and functions

## 1.2.2 Functions that are available to use

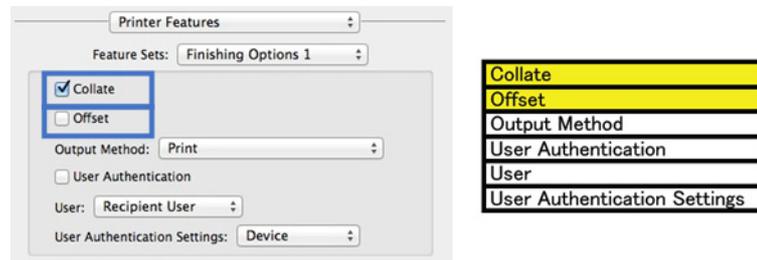

The following table shows the available functions and where to find them.

Functions Available for Use	Note	Where to find
